

# Welcome to Cure One

*Kamal,  
8 years old  
in Nepal*

You are ridding the world of the life-destroying biblical disease of leprosy – one person at a time.

**YOUR CURE ONE LEGACY  
ZERO LEPROSY BY 2035**

# Thank You for becoming a Cure One Supporter

## CURE

For most of history, leprosy had no cure. It led slowly but surely to a lifetime of disability, misery, and lonely isolation. There is now a cure. With Cure One you will provide the many months of medication it takes to completely Cure someone's leprosy. Thank you!

*Satendra  
with his  
medication*

## CARE

Leprosy maims both body and spirit, but with Cure One you provide the Care someone needs to recover - such as hospital treatment and surgery; physiotherapy for leprosy-damaged hands and feet; prosthetic devices to replace lost toes, fingers, or limbs; and counselling to mend a heart broken by rejection and shame. Thank you!

*Fatima receiving care  
(prosthetic limb) hugs her child*

*Mother Teresa said, "help one person at a time." That is exactly what your wonderful Cure One support will do. Cure One is regular giving based on Jesus' parable of The Good Samaritan. Thank you for paying someone's expenses through the three vital steps towards life after leprosy. Cure, Care and Restore.*

## RESTORE

Because of ancient fears, a person cured of leprosy may need help to regain their standing in their community. With Cure One you may be helping a child be accepted back at school, or you may assist someone affected by leprosy into vocational training or with seed funding for a small business to earn a living. Your support will help Restore someone to life and hope after leprosy. Thank you!

*Shahen learning to sew*

*Thank you for saying*

**“Yes, I will Cure One today  
for Zero Leprosy by 2035.”**

Because of support like yours, these are the last days of leprosy. This biblical disease is so close to being wiped out forever. Even now, 3-4 million people continue to be affected by leprosy.

There are around 200,000 new cases per year – Every 2 minutes a child is diagnosed with leprosy. Most people have forgotten about this ancient threat – but you have not. On behalf of every grateful family like Kamal's, who cannot afford to cure leprosy on their own, thank you for becoming a Cure One supporter.
